"Sollis were requested by a key customer to Escrow their software as part of the completion phase of a major project. Following an extensive investigation of the solutions available, Sollis chose Intellect as their Escrow partner. The main reasons for choosing Intellect were:

Flexible approach - e.g. the ability to upgrade from single to multiple user agreements or to have a customized agreement if required; Simplicity of the process; Price, particularly when discounts for members were taken into account; and a "soft sell" approach. The whole process was completed in less than one week.

In addition to the many other benefits we get from our membership Intellect's Escrow service has proved to be a cost effective and easy to use process which has more than met both ours and our customer's expectations. I would strongly recommend the service to other SMEs and the cost savings involved, compared to other solutions, will on their own go a long way to paying back the membership fees.&rdquo;
